Dear Sir or Madam,

Here are my brief comments regarding the Microsoft Settlement. PLEASE...let there be no slap on the wrist this time around. Microsoft's strangle-hold on the market does little to enhance computing for the consumer. I want a choice.

Thanks goodness they were not allowed to stomp down Apple in the education market as well.

I have hope that Microsoft will face justice eventually, despite all the money and power they have at their disposal.

Thanks for taking time to review my comments.

Best Regards,
